

Project Toolkit documentation

Main documentation

- Tbd.

SonarQube

- [Tryout SonarQube](#)
- [Server setup](#)
- [Docker image](#)
- [C++ support](#)

Additional material

- Tbd

TODO

- `sh run nameOfConfiguration` instead of `sh Run/Some/Path/script.sh`
- Project Toolkit includes mechanis:

```
IMPORT "Utils/VSCode/Something" # Where Something corresponds to `Soemthing` or  
`Soemthing.sh`
```
